

TrendStack Nigeria Playbook

02 - 90-Day Operational Roadmap

A step-by-step execution plan to validate paid demand, repeat campaigns and manual operations.

Operating principle

Do not build more software until paid demand and repeatable campaign operations are proven. Use WhatsApp, Sheets, simple forms, Drive and manual reporting first.

Document	Purpose	Use it when
02	A focused guide that separates strategy from execution so the founder and Nigeria team can act without information overload.	Use this as a working playbook. Review it weekly, mark what is done, and update based on paid campaign evidence.

Version 1.0 - 17 May 2026

Inputs used: founder context, current TrendStack learnings, and the uploaded Growth Marketing Plan for Trendstack.

1. 90-day target outcome

The roadmap is designed to prove paid demand, repeat demand and campaign reliability before software investment.

90-day mission

Close and execute 5-10 paid Nigerian SME campaigns manually. Get at least 2-3 repeat commitments. Learn which verticals, packages, prices and creator types actually work.

Metric	Target by Day 90	Why it matters
Paid campaigns	5-10 completed	Proves SMEs will pay, not just show interest.
Repeat intent	2-3 repeat bookings or signed next campaign	Proves the service creates enough value to continue.
Creator bench	30-50 vetted creators	Enough supply for pilots without creating operational chaos.
Lead pipeline	150 qualified SME leads	Creates enough conversations to test demand.
Proposals	20 serious proposals	Tests pricing, objections and close rate.
Margin	20-30% after creator payments and ops	Shows the model can become a business.

2. Days 1-7: lock the operating foundation

Do not start with chaos. Decide the minimum structure before recruiting creators or selling campaigns.

- [] Choose first city: Lagos first unless there is a strong existing network elsewhere.
- [] Choose first 2-3 verticals: beauty/skincare, fashion/accessories and food/restaurants.
- [] Choose first package: Starter Sprint and Growth Sprint only.
- [] Set minimum price floor. Do not accept underpriced campaigns that drain operations.
- [] Create one campaign brief template, one creator vetting sheet, one lead tracker and one report template.
- [] Create simple creator agreement terms and business campaign terms.
- [] Assign roles: business development, creator operations, campaign lead/reporting owner.

Day 7 deliverable	Definition of done
Campaign package sheet	A one-page description of each package, deliverables, price range and payment terms.
Creator intake form	A form that collects city, niche, platform links, follower count, average views, sample videos, rates and WhatsApp.
Lead tracker	A sheet with business name, contact, industry, goal, budget, stage, next step and owner.
Report template	A clean structure for showing posts, metrics, leads, comments, learnings and next recommendation.

3. Days 8-21: build the campaign-ready creator bench

The goal is not a big community. The goal is a small, reliable bench that can execute paid briefs.

Target: 30-50 vetted creators across the first 2-3 verticals.

Step	Action	Output
1	Source creators from your existing 200, Instagram/TikTok search, referrals, campus/lifestyle communities and niche pages.	Raw creator list.
2	Screen for city, niche fit, content quality, average engagement, comment quality and brand-safe behavior.	Shortlist.
3	Ask for rates, availability, preferred niches and sample content. Confirm WhatsApp responsiveness.	Creator profile.
4	Assign creator tier: New, Verified or Trusted. Most creators start as New.	Tiered creator bench.
5	Run a mini test: ask selected creators to respond to a mock brief or submit content samples.	Reliability signal.

Non-negotiable

Do not promise creators that campaigns are guaranteed. Say: "We are building a vetted pool. Paid briefs will come when your profile matches a campaign."

4. Days 15-45: sell paid pilots

Sales begins while creator vetting is still happening. Waiting for a perfect creator pool delays the real test.

Timing	Action	Target output
Week 3	Build 150 qualified leads across chosen verticals. Prioritize businesses already spending on social media or influencer/content work.	Lead tracker populated.
Week 3-4	Contact 50-70 leads through WhatsApp, Instagram DM, LinkedIn, phone and warm intros.	Conversations started.
Week 4-5	Run discovery calls. Understand product, audience, campaign goal, budget, current marketing and decision maker.	Qualified opportunities.
Week 5-6	Send 20 proposals with one recommended package each. No complex menus.	Proposals sent.
Week 6	Close 3-5 paid pilots. Collect payment upfront before campaign work starts.	Paid campaigns booked.

Daily sales rhythm: 20 new contacts, 10 follow-ups, 2-3 discovery calls, 1 proposal update, and one end-of-day pipeline review.

Rule: discounted pilots are acceptable if margin is protected. Free pilots are not validation.

5. Days 45-75: run the paid pilots manually

Each campaign should follow the same operating rhythm so the team learns what can later be automated.

#	Step	What happens
1	Payment received	Campaign starts only after upfront payment or agreed deposit.
2	Business discovery	Clarify target audience, campaign goal, product offer, CTA and restrictions.
3	Brief creation	TrendStack writes a simple brief with content angle, posting rules, timeline and CTA.
4	Creator matching	Invite only creators who fit the category, city and audience.
5	Content creation	Creators submit drafts before posting.
6	Review and approval	TrendStack checks brand safety, brief compliance and claims before business approval.
7	Posting window	Approved creators post within agreed dates and submit proof.
8	Tracking	Collect links, screenshots, metrics, WhatsApp clicks, coupon usage or reported sales/leads.
9	Payout	Creators are paid after completion, not before, subject to quality and proof.
10	Final report	Deliver report within 72 hours after campaign end.
11	Repeat pitch	Recommend next campaign based on what worked.

6. Days 75-90: review, decide and productize carefully

Do not assume the model works. Score the evidence objectively.

Status	Evidence	Decision
Green	5+ paid campaigns, 2+ repeat commitments, margin above 20%, creator chaos manageable, reports understood.	Continue. Standardize packages, improve tools and build only the most painful automation.
Yellow	Paid campaigns closed but repeat demand or margin is weak.	Adjust pricing, reduce creator count, improve reporting or narrow vertical focus.
Red	Lots of interest but few payments, campaigns too chaotic, customers do not repeat.	Simplify into UGC/content procurement or change target customer. Do not build software yet.

Productization test: only automate repeated manual tasks that occur in at least 5 campaigns and directly improve speed, trust, payout control or reporting.

7. Weekly operating cadence

This keeps the Nigeria team focused on execution, not general activity.

Day	Focus	What happens
Monday	Pipeline and campaign planning	Review sales pipeline, campaign statuses, creator availability and weekly targets.
Tuesday-Wednesday	Sales push and creator matching	Contact new leads, follow up with warm leads, shortlist creators for active campaigns.
Thursday	Content review and reporting checkpoint	Review submitted content, update dashboards, resolve campaign blockers.
Friday	Results review and repeat-campaign asks	Review metrics, send reports, ask completed customers to book the next campaign.
Weekend	Creator/community touchpoints	Light creator check-ins, content examples, social proof collection and event attendance if useful.

Weekly founder review

Ask only four questions: How many paid campaigns closed? Which customers can repeat? Which creators failed or performed well? What should be changed in the offer next week?

8. Templates to create immediately

These are the operating assets you need before the first paid campaign.

- [] One-page sales deck or PDF: problem, offer, packages, sample report and payment process.
- [] Creator intake form: city, niche, platforms, rates, samples, audience location, availability and WhatsApp.
- [] Business intake form: company, product, goal, target customer, campaign budget, CTA and restrictions.
- [] Lead tracker: source, industry, contact, stage, budget, next step, owner and notes.
- [] Campaign tracker: creator, status, draft link, approval status, post link, metrics, payout status and risk notes.
- [] Campaign brief template: objective, audience, product, hook ideas, CTA, do/dont, timeline and approval process.
- [] Final report template: campaign summary, posts, metrics, leads, comments, learnings, best creators and next recommendation.

Software later: once these templates are used repeatedly, you will know exactly which part needs technology.
